

# Soil Conditioners

Stock#	Grade	Warehouse	Bags/Pkt	List	Grower
TRWVMIC26 6 cu.ft.	#2 Coarse	SU, WV	22	\$38.04	\$31.95
		ST, GG	22	35.51	29.83
TRWVMIC36 6 cu.ft.	#3 Medium	SU, WV	22	37.71	31.68
		ST, GG	22	35.51	29.83

## Vermiculite (Unscreened)

This mica-type mineral is heated to a sterile 1,400°F, expanding it into particles capable of holding much air, water and nutrients. The mineral itself contains potassium, magnesium and calcium available in slow release. It has an absorbent capacity for fertilizer and also buffering and cation exchange.

For shipments via McConkey truck per pallet delivery fees will apply. F.O.B. McConkey Co. Warehouses

## Horticultural Perlite

Perlite is volcanic material heated to a sterile 1,800° F, making it porous. Particles provide excellent drainage while trapping air and water on its irregular surface. Weighing 4.5 to 8.5 lbs. per cu. ft., perlite will hold 3-4 times its own weight in water. It is neutral in reaction and has no buffering action or cation-exchange capacity like vermiculite has. Perlite is used as a propagation medium, an addition to soils and soilless mixes, and for packing, storing and shipping. particle size is 2-4 with pH range of 6.0-8.0.

Stock #	Product	Warehouse	Bags/Pallet	List Price	Grower Price
TRWPERL6	Perlite 6 cu.ft. Horticultural Grade	SU, WV	22	\$26.62	\$22.36
		ST, GG	22	24.06	20.21

For shipments via McConkey truck per pallet delivery fees will apply. F.O.B. McConkey Warehouses

## Agrosoke Root Watering Crystals

- AGROSOKE is not a super-absorbent and does not compete with the plant for available water.
- It hydrates to a particle size that is similar to that of perlite and will not swell and push soil and plants out of a pot, even when mixed in dry.
- AGROSOKE by holding water in a dry

particle improves air space and drainage at the same time that it provides a water reservoir in the media.

- Water held by Agrosoke particles is released to the plant through capillary action so that water held is plant-available water. Other polymers release water to the media and it evaporates or leaches.

F.O.B. Arlington, TX

Stock #	Description	Case Pack	List Price	Grower Price
AGS2OZ	2 oz. packet	1	\$3.51	\$2.95
AGS5	5 lb. jug	1	69.09	58.04
AGS25	25 lb. pail	1	227.27	190.91
AGS55	55 lb. bag	1	400.00	336.00

## Dip'N Grow

Dip'N Grow is recommended for use on all nursery stock cuttings. It is more effective than powder because it absorbs more rapidly and evenly into the cuttings.

Stock #	Description	List Price	Grower Price
DNG00201	2 Fl. Oz. Bottle of Dip'N Grow	\$10.90	\$9.16

◆ Available special order only. Price at time of shipping will apply.
